

FuelerPlus™

PUMP YOUR MONEY WISELY.

Fuel Management Software

Managing fuel consumption can be a challenge. This difficulty is often due to the number of different systems you may use to capture different fuel data.

But with **FuelerPlus**, data is gathered from whatever systems you use, and delivered in an easy-to-use format. All of your company's fuel transactions can be displayed in one place—whether you're dealing with fuel dispensed by your fuel trucks or transactions recorded by third party vendors such as Gasboy, Phoenix Fuel Systems, or Wright Express.

And it doesn't stop there. **FuelerPlus** can capture everything your fuelers do as well, including topping off fluids and servicing your equipment. This information is collected, placed at your fingertips, and seamlessly exported to your accounting system.

Take the pain out of fuel tracking today.

Top Features

- Mobile component that captures each fueler's activities, including amount dispensed, repairs, meter readings, and duration on the job
- Office component that analyzes data across all fuelers
- Management of various types of fuel dispensed to equipment or to a job
- Comparison of actual vs. estimated fuel consumption
- Integration with other HCSS products and accounting systems

Top Benefits

- Gain control of your fuel expenses
- Avoid year-end fuel adjustments
- Identify fuel hogs to make smarter sell vs. repair decisions
- Get a better understanding of your fueler's time and activities
