

Safety Application

MOVE YOUR SAFETY PROGRAM INTO THE 21ST CENTURY.

Safety Management Software

Job site safety is essential in maintaining a healthy workforce and profit margin. That's why it's important you monitor and track the progress of your employee, environmental, and job site compliance. But with the various levels of safety meetings, inspections, and documentation involved, safety management can be rather complex.

To ease the process, HCSS provides a great safety management solution that covers your safety needs—from capturing daily activities and incidents in the field to managing data in the office. It helps you analyze jobs, recognize lagging and leading indicators, calculate job site lost time, and deliver OSHA reportables.

The HCSS *Safety Application* does it all. Capture, store, and report your safety data with ease.

Top Features

- Leading, lagging, and key risk indicator analysis
- Employee training and safety history
- Alerts for expiring certifications and training
- Smart storage and quick access to safety inspections, incident claims, and OSHA logs
- Safety meeting, inspection, and incident reporting directly from the field

Top Benefits

- Improve OSHA compliance and save time by keeping your safety data organized and instantly accessible.
- Stay safe and profitable by preventing accidents before they occur
- Create a great safety culture & reputation
- Increase communication and recordkeeping between your office and job sites

"HCSS has done something very important for the construction industry by creating the Safety Application. I wouldn't want to manage MGE's Safety & Health any other way."

Ryan Smith, Safety & Health Manager
MGE Underground (CA)
